

Next Generation Reports Available Now

PureFacts' PureReports technology is a wealth management game-changer. It incorporates artificial intelligence (AI) and machine learning (ML) to deliver insights that can help businesses move from being reactive to proactive. PureReports can help advisors understand the meaning behind the metrics and deliver on what's important to their clients.

PureFacts' technology pulls data from all your warehouses, custodians, in-house and partner systems. It derives key metrics from your sources, audits results to ensure accuracy across multiple platforms, reconciles the data and returns it to your source systems. This process improves your data and provides users with an accurate view of your consolidated intelligence.

PureFacts advances your business

Removes Unproductive Processes

- » Automates rote tasks, freeing up advisor time to focus on building business
- » Best value solution with lowest total cost of ownership
- » Eliminates many manual back-office operations

Increases Transparency

- » Dashboards at the enterprise and advisor level allow for a multi-level view of the business
- » Client portal is personalized, contextual and easy to use

Improves Service Quality

- » Creates cross collaboration opportunities between business units and improves SLA's
- » Highly integrated, flexible, scalable, and reliable architecture makes it easy to grow your business without interruption

Reduces Risk

- » Helps maintain compliance at all levels
- » Supports client retention with an optimal user experience
